ACADEMIC CORE COURSES

The middle level program provides a portion of time known as an academic core, where students study the subjects of English language arts, mathematics, science, and social studies.

Reading is also recognized as a major process by which students learn and, consequently, is part of instruction used by each teacher in each subject at each grade level.

Students in the sixth grade academic core also have designated reading time. Instruction in the seventh grade academic area is geared to meet individual needs. Instruction in the eighth grade academic area is geared toward assisting students in making the transition from middle school to high school. Academic core courses meet every day all year.

REQUIRED AND ELECTIVE EXPLORATORY COURSES

The middle level program offers a portion of time to explore various areas of study. Included in these areas are some required exploratory courses and many elective exploratory courses. These courses offer students the chance to explore their career interests and begin the career planning process. In most cases, these courses, whether required or elective, meet every other day all year. Study halls are assigned during periods when classes are not scheduled.

GIFTED AND TALENTED

Opportunities for gifted and talented students at the middle school level include advanced courses such as Accelerated English Language Arts 7 and 8, Accelerated Mathematics 7, Algebra 1, and Exploring STEM. Students may also take the required high school Health and Wellness course in eighth grade. On occasion, students may need to take courses beyond these options; in these situations, parents should discuss placement with their school's Gifted and Talented Resource Teacher (GTRT) to best meet the needs of their student. For more information, check this coursebook, discuss options with your student's teachers, contact the Gifted and Talented Resource Teacher, contact the school counselor, or check the district website: http://www.gbaps.org/why_choose_gbaps/district_programs/gifted_talented/.

SPECIAL EDUCATION

The course description book has been designed so all courses for students with special education needs are embedded in the content area course description book. If you have questions or concerns about course selection for your child, please contact your child's IEP teacher or school counselor for more information. Green Bay Area Public Schools offer a complete range of educational opportunities for all students with special education needs. Special Education programming may involve a student in regular education courses, with or without accommodations and/or support, an academic lab, a self-contained classroom or combination of these options. Various program options can be designed to meet the student's educational needs through the student's individual education plan (IEP). Placement decisions are made based on the student's IEP.

MIDDLE SCHOOL COURSES AND HOW THEY MAY HELP STUDENTS MEET HIGH SCHOOL GRADUATION REQUIREMENTS

High school credit will be awarded to middle school students in grades 7-8 for taking equivalent high school courses at their middle school and for courses taken at the high school. This credit can count toward the District requirement of twenty-two (22) credits and as part of the specific requirement in the various academic areas. Students involved in earning these credits will still be required to take four (4) credits of English language arts, three (3) credits of social studies, three (3) credits of mathematics, three (3) credits of science, and one and one-half (1½) credits of physical education in Grades 9-12. The course(s) will automatically appear on the transcript with credit given, and the grade(s) will be computed in the grade point average. If a parent/guardian determines at any point in the student's career that the course(s) will not be taken for credit, the parent/guardian must contact their student's counselor in writing for removal of the course and credit from the transcript. (This does not apply to the high school Health and Wellness course.) The course(s) and grade(s) will not appear on the transcript, no credit will be given and the grade will not be computed as part of the high school grade point average. Additionally:

- In 7th and 8th grade, students can earn credit for world language courses. See the World Language section for specifics.
- Students in 8th enrolled in Accelerated English Language Arts 8 may receive high school elective credit. Four (4) credits of English must still be taken in grades 9-12 to meet graduation requirements.
- Students in eighth grade enrolled in Algebra 1 may receive high school elective credit. Three (3) credits of math must still be taken in grades 9-12 to meet graduation requirements.
- Students in 8th grade enrolled in Geometry at a high school site may receive credit toward the three (3) required math credits needed to graduate or may opt for an elective credit.
- Students in 8th grade may elect to take the high school Health and Wellness course offered at the middle school site. This course meets the high school health requirement for graduation. The grade will be counted in the high school grade point average and appear on the high school transcript.

NOTE: Wisconsin Civics Graduation Requirement

In order to receive a high school diploma, students must meet the Civics Test Requirement outlined by Wisconsin State Act 59.
MIDDLE SCHOOL DUAL LANGUAGE PROGRAM
The Dual Language Program at the Middle School is open to all students who participated in a dual language program (either a one-way or two-way bilingual program) at one of the elementary schools. Parents and students make a choice to continue the program at the middle school. Students who choose the Dual Language Pathway at the Middle School enroll in the following courses:

**6th Grade**
- English Language Arts 6
- Dual Language U.S. History Survey OR
- Dual Language Physical Science

**7th Grade**
- English Language Arts 7
- Dual Language World Cultures and Geography
  OR
- Dual Language Life Science

**8th Grade**
- English Language Arts 8
- Dual Language Early Civilizations OR
- Dual Language Earth and Space Science

SUMMER SCHOOL
Students should begin to think about enrolling in learning opportunities offered during the summer. It is a good idea and excellent planning for students to consider earning additional credits to apply toward graduation, taking a course for enrichment, or simply pursuing learning that is of interest.

Course information and registration materials will arrive in middle schools in early April. It is the student's responsibility to register in a timely manner. Both credit and non-credit opportunities are planned and will be offered based on sufficient enrollment.

DROPPING CLASSES
A middle school student must have the permission of the student's parent/guardian, teacher and building principal to withdraw from an elective course. Students must be scheduled into the required number of courses (6). Reasons for allowing a student to withdraw from a course include, but are not limited to, physical, mental or emotional concerns, inappropriate placement, or other circumstances beyond the student's control.

ADDITIONAL FEES
Some courses may have additional fees for materials and supplies. Consult with your school counselor if you have questions on these fees or any other fees.

TURBOCHARGE with College Credit

Turbocharge with College Credit is a PK-16 partnership between the Green Bay Area Public Schools, Northeast Wisconsin Technical College, and the University of Wisconsin-Green Bay with a shared transformational vision to create a college-going culture. It is an intentional effort by the partners to successfully transition high school graduates to postsecondary education (4-year college/university, technical college, or military) by having them earn college credit towards a certificate, credential, or degree upon graduation.

For more information about Turbocharge, visit [www.gbaps.org/turbocharge](http://www.gbaps.org/turbocharge).
CO-CURRICULAR ACTIVITIES

This page lists many school/community activities that are available to middle school students. This is not an all-inclusive list and activities available are subject to change. Participation in co-curricular activities has been cited in numerous studies as very important in developing lifelong and job related skills such as teamwork, self-motivation, problem solving, creativity, and self-discipline.

ATHLETIC AND INTRAMURAL AT INDIVIDUAL SCHOOLS

Basketball – Boys (6-8)  Softball – Girls (6-8)
Basketball – Girls (6-8)  Track and Field – Boys (6-8)
Cross Country – Boys (6-8)  Track and Field – Girls (6-8)
Cross Country – Girls (6-8)  Volleyball – Girls (7-8)
Football (7-8)  Wrestling (6-8)
Soccer (6-8)

*Career and Technical-Related Student Club Activities.
Academic and Career Planning Conferences

Academic and Career Planning Conferences are a key ingredient of the student planning process. School Counselors direct this opportunity to assist students in the planning, monitoring and managing of their academic, career and personal development. Through these activities, students are encouraged and given opportunities to set and evaluate their educational and career goals and make connections to activities that will support goal achievement.

Academic and Career Planning conferences are scheduled for all 8th-grade students and include both students and parents. Topics discussed include student’s individual learning plan, transitioning to high school, academic and career goals, course selection based on goals and other opportunities.

Career Clusters Prepare All Students for the Future

Career clusters link what students learn in school with the knowledge and skills they need for success in the future. Career clusters identify pathways from high school to technical, two and four-year colleges, graduate school, and the workplace, so that students can learn in school what they can do in the future. This connection to future goals motivates students to work harder and enroll in rigorous courses.

Technological advances and global competition have transformed the nature of work. Tomorrow's jobs will require more knowledge, better skills, and more flexible workers than ever before. Tomorrow's workers must be prepared to change jobs and careers several times, continually updating their knowledge and skills.

“Our 16 broad career clusters will help students enhance the link between the knowledge they acquire in school and the skills they need to pursue their dreams. Without limiting students, career clusters help them focus on an area of interest or a possible career path.”

~Richard W. Riley, former U.S. Secretary of Education

These 16 career clusters represent all career possibilities. They are an ideal way to organize course selection and student work-related experiences. Understanding career clusters prepares students for a wide range of careers in the 21st-century economy by helping students achieve academic success and improved employment outcomes. For more information on career clusters and pathways, see your school counselor.
Academic and Career Planning is a student’s journey to develop awareness of self, through exploration and collaboration with parents, educators, and mentors, opening the door to endless possibilities.

The ACP process encompasses the activities, instruction, resources, experiences, and opportunities provided by the school district in partnership with our community to assist students in developing and implementing a plan for their academic and career future.

Tools to support ACP:
- Online Tools: Xello, Infinite Campus, Parchment
- Testing Results: PALS, STAR, State testing, ACT-Aspire, PSAT, ACT, WorkKeys
- Course opportunities: IB, AP, Dual Credit, Online, Project-based, Specialized Programs & Schools
- Work-based learning experiences
- Community involvement
- Academic and Career Planning Conferences
THE 16 CAREER CLUSTERS

The Green Bay Area Public School District is developing programs of study around these 16 career clusters. Students should speak with their School Counselor if they have questions about career clusters or programs of study.

AGRICULTURE, FOOD & NATURAL RESOURCES
The production, processing, marketing, distribution, financing, and development of agricultural commodities and resources including food, fiber, wood products, natural resources, horticulture, and other plant and animal products/resources.
Related Pathways: Food Products and Processing Systems; Natural Resources Systems; Plant Systems; Environmental Service Systems; Animal Systems; Agribusiness Systems; Power, Structural & Technical Systems

ARCHITECTURE & CONSTRUCTION
Careers in designing, planning, managing, building, and maintaining the built environment.
Related Pathways: Design/Pre-Construction; Maintenance/Operations; Construction

ARTS, A/V TECHNOLOGY & COMMUNICATION
Designing, producing, exhibiting, performing, writing, and publishing multimedia content including visual and performing arts, design, journalism, and entertainment services.
Related Pathways: Audio and Video Technology and Film; Performing Arts; Printing Technology; Journalism and Broadcasting; Visual Arts; Telecommunications

BUSINESS MANAGEMENT & ADMINISTRATION
Encompasses planning, organizing, directing, and evaluating business functions essential to efficient and productive business operations. Business Management and Administration career opportunities are available in every sector of the economy.
Related Pathways: Administrative Services; Human Resource Management; Business Information Management; Operations Management; General Management

EDUCATION & TRAINING
Planning, managing, and providing education and training services, and related learning support services.
Related Pathways: Administration and Administrative Support; Professional Support Services; Teaching/Training

FINANCE
Planning, services for financial and investment planning, banking, insurance, and business financial management.
Related Pathways: Accounting; Insurance; Banking Services; Securities and Investments; Business Finance

GOVERNMENT & PUBLIC ADMINISTRATION
Executing governmental functions to include Governance; National Security; Foreign Service; Planning; Revenue and Taxation; Regulation; and Management and Administration at the local, state, and federal levels.
Related Pathways: Governance; Revenue and Taxation; National Security; Regulation; Foreign Service; Public Management and Administration; Planning

HEALTH SCIENCE
Planning, managing, and providing therapeutic services, diagnostic services, health informatics, support services, and biotechnology research and development.
Related Pathways: Therapeutic Services; Support Services; Diagnostics Services; Biotechnology Research and Development; Health Informatics
HOSPITALITY & TOURISM
Encompasses the management, marketing and operations of restaurants and other food services, lodging, attractions, recreation events and travel related services.
Related Pathways: Restaurants and Food/Beverage Services; Travel and Tourism; Lodging; Recreation, Amusements, and Attractions

HUMAN SERVICES
Preparing individuals for employment in career pathways that relate to families and human needs.
Related Pathways: Early Childhood Development and Services; Personal Care Services; Counseling and Mental Health Services; Consumer Services; Family and Community Services

INFORMATION TECHNOLOGY
Related Pathways: Network Systems; Web and Digital Communications; Information Support and Services; Programming and Software Development

LAW, PUBLIC SAFETY, CORRECTIONS & SECURITY
Planning, managing, and providing legal, public safety, protective services, and homeland security, including professional and technical support services.
Related Pathways: Correction Services; Law Enforcement Services; Emergency and Fire Management Services; Legal Services; Security and Protective Services

MANUFACTURING
Planning, managing, and performing the processing of materials into intermediate or final products and related professional and technical support activities such as production planning and control, maintenance and manufacturing/process engineering.
Related Pathways: Production; Quality Assurance; Manufacturing Production Process Development; Logistics and inventory Control; Maintenance, Installation and Repair; Health, Safety, and Environmental Assurance

MARKETING
Planning, managing, and performing marketing activities to reach organizational objectives.
Related Pathways: Marketing Communications; Merchandising; Marketing Management; Professional Selling; Marketing Research

SCIENCE, TECHNOLOGY, ENGINEERING & MATHEMATICS
Planning, managing, and providing scientific research and professional and technical services (e.g., physical science, social science, engineering) including laboratory and testing services, and research and development services.
Related Pathways: Engineering and Technology; Science and Math

TRANSPORTATION, DISTRIBUTION & LOGISTICS
Planning, management, and movement of people, materials, and goods by road, pipeline, air, rail and water, and related professional and technical support services such as transportation infrastructure planning and management, logistics services, mobile equipment and facility maintenance.
Related Pathways: Transportation Operations; Facility and Mobile Equipment Maintenance; Logistics Planning and Management Services; Sales and Service; Warehousing and Distribution Center Operations; Health, Safety and Environmental Management; Transportation Systems/Infrastructure Planning, Management and Regulation
SPECIALTY SCHOOLS
AND
PROGRAMMING
International Baccalaureate (IB) – Middle Years Programme (MYP)

Franklin Middle School is the area’s first Middle Years International Baccalaureate (IB) School. This programme provides students rigorous instruction wrapped in global awareness and authentic learning opportunities. Students successful in the completion of the MYP earn high school credit and are well prepared for high school, advanced coursework (including the Diploma Programme at West High School) and have a solid foundation for post-secondary education.

What is the IB Middle Years Programme?

The IB Middle Years Programme, for students aged 11 to 16, provides a framework of academic challenge that encourages students to embrace and understand the connections between traditional subjects and the real world and become critical and reflective thinkers.

The Curriculum

The programme consists of eight subject groups integrated through six global contexts that provide a framework for learning within and across the subjects. Students are required to study their native language (language and literature), a second language (language acquisition), social studies (individuals and societies), sciences, mathematics, arts, physical and health education, and design. In the final year of the programme, students also engage in a community project, which allows them to demonstrate the understandings and skills they have developed throughout the programme.

The curriculum is illustrated by the programme model below with eight academic areas or subject groups surrounding the global contexts and the learner profile.
Assessment

Assessment is criterion based, so students around the world are measured against specified criteria for each subject group. Teachers set assessment tasks that are measured internally in the school.

For more information on the comprehensive K-12 International Baccalaureate Programmes (www.ibo.org) offered only through Green Bay Area Public Schools, contact:

Diploma Programme – Green Bay West High School – (920) 492-2600
Grades 11 and 12
● Michelle Jacobson, Principal
● Stephanie Bielen, IB Coordinator
● Sarah Schultz, IB School Counselor

Middle Years Programme – Green Bay West High School – (920) 492-2600
Grades 9 and 10
● Michelle Jacobson, Principal
● Andrew Evenson, IB Coordinator

Middle Years Programme – Franklin Middle School – (920) 492-2670
Grades 6 – 8
● Greg Lundin, Principal
● Jennifer Burgraff, IB Coordinator
● Brooke Rousseau, IB School Counselor

Primary Years Programme – Chappell Elementary School – (920) 492-2630
Grades K – 5
● Kris Worden, Principal
● Jackie Brosteau, IB Coordinator
A Project-Based Learning Charter School
“Learning by Doing!”

Are you excited to research what interests you?
Are you passionate about learning, ready to take on the future and make an impact in it?

John Dewey Academy of Learning (JDAL) offers an innovative choice for 6th – 12th grade students in the Green Bay Area Public School District. JDAL provides students with the opportunity to thrive in a collaborative, interdisciplinary, technology-rich learning environment. Students engage with the world outside the classroom walls by delving into the exciting world of partnerships with Green Bay area organizations and businesses. Students take ownership of their learning by synthesizing authentic projects that focus on topics relevant to their lives. JDAL students have the opportunity to do a Project-Based Learning path, an Online-Learning path, or a Blended path to meet the requirements for graduation.

In addition to offering innovative academic instruction, the John Dewey Academy of Learning places special emphasis on the development of close relationships among students, teachers, and community members. Every day, teachers meet with their advisories to work on interpersonal skills and community building. JDAL places less distinction on grade levels and focuses on developing an inclusive school community.

The mission of the John Dewey Academy of Learning is to provide students with a rigorous project-based curriculum and a safe caring community in which to learn. By developing the whole person – academically, professionally, and personally – JDAL will assist students in reaching their full potential.

Community Principles:
- Be Motivated
- Be Responsible
- Be Positive
- Be Respectful

PROJECT-BASED LEARNING PATH

Educators at the John Dewey Academy of Learning believe that learning is active. Learners come to school to get involved in things and participate in a community, which gives them real, guided experiences that increase their capacity to meet their full potential. (Paraphrased from John Dewey, Experience and Education, 1938)

Educators at the John Dewey Academy of Learning believe that learners should be involved in real-life tasks and challenges. Students should have a hand in choosing and designing these tasks. They should be involved in bringing the learning to life. They should be actively involved in the assessment of their learning.

Educators at the John Dewey Academy of Learning believe that they function as mentors and coaches. They encourage the learner to think deeply and critically, and lovingly about their passions. They help students construct meaningful, focused, rich lines of inquiry. They guide students to choose learning targets and learning experiences that will result in meaningful lifelong learning. They conduct students through continuity in learning, assisting learners to include areas in which they need to develop. They help students focus on content and process. They help students assess themselves for two purposes:
- To evaluate the rigor and quality of their products
- To provide continuity for the next learning

Project-Based Learning (PBL) students:
- Are interested in project-based learning
- Are independent, self-directed learners
- Have an area of passion that cannot be met in a traditional school setting
- Are open to a new model of learning
- Are interested in using technology
- Have a willingness to learn time management and independent work skills
- Demonstrate appropriate maturity level to work with peers/adults and are coachable
- Persevere to reach independent goals
- Are capable of reflecting on their work and assessing their learning and skills

Table of Contents
Students in 9th-12th grade are enrolled in 2-4 courses at a time, throughout the year, equaling a total of 5-6 credits per year. ALEKS math, a web-based math assessment and learning program used by JDAL students, should be chosen as the online site for completing math courses. The online advisor is assigned to the students to guide their learning, set deadlines, determine coursework necessary for post-secondary options, conduct check ins, and offer any assistance needed for completing learning. Face-to-face time with the advisor could be online or in person based on the student's needs. Students would have an additional credit (150 hours) of service learning to complete the 23 credits necessary for graduation from John Dewey Academy of Learning (JDAL).

Students have the opportunity to participate in any of the enrichment seminars, workshops, or field experiences offered at JDAL, with the potential of earning credit in the content areas. Junior and senior year will include the creation of a capstone portfolio of work that would be a culmination of the interest courses chosen throughout the years, in addition to their goals for post-secondary education. Students will have the opportunity to take their learning into the community to get further hands on experience and job shadowing in those areas of interest as part of the learning documented in their portfolios. Students will be provided a device, charger, and kajeet for Wi-Fi.

Online Students:
- Are independent learners
- Are capable of staying on task with minimal adult directives
- Learn best by reading
- Are organized
- Are good at meeting deadlines

Credit Earning:
Grade 8: 5 Middle School credits
(Credits earned in grade 8 apply towards graduation as electives only if earned in higher-level math, health, or foreign language.)
Grade 9: 5 credits
Grade 10: 6 credits
Grade 11: 6 credits
Grade 12: 6 credits

The following credits are required for graduation:
- English Language Arts: 4 credits
- Mathematics: 3 credits
- Social Studies: 3 credits
- Science: 3 credits
- Health: 0.5 credit
- Physical Education: 1.5 credits
- Personal Financial Literacy: 0.5 credit
- Service Learning: 1 credit

❖ Students must correctly answer at least 65 of 100 questions identical to the U.S. Citizenship Test in order to graduate from a WI public, charter, or private school participating in a parental choice program.

For PBL students, logging 75 hours of learning plus performance at the level of competency or above earns .5 credit. Logging 150 hours of learning plus performance at the level of competency or above earns 1 credit. A student could complete a math credit in less than 150 hours when the student demonstrates proficiency with his/her ALEKS Math course.

Math literacy is developed through ALEKS, individual work, and workshops. English language literacy is developed through literacy circles, writing workshops, and Achieve3000. Project-Based Learning is used for independent work, seminars, workshops, field experiences, and research.

Learning at JDAL will culminate with a Senior Capstone Project. The Capstone Project is a required, in-depth, community and career-focused project, worth 3 credits.

Enrollment:
The process for enrollment includes a tour, student shadow day, and completion of appropriate district enrollment forms. If interested in learning more about JDAL’s program offerings, please discuss with your school counselor and contact JDAL at (920) 272-7074. John Dewey Academy of Learning is located at 701 Cherry Street, Green Bay, WI 54301.
Engage - Educate - Empower
College - Workforce - Community

The educational experience of Northeast Wisconsin School of Innovation (N.E.W. Innovation) is to prepare students for college, workforce, and life. Our unique learning experience provides a relevant and meaningful college and career preparatory education focused on the whole child. N.E.W. Innovation provides a choice for students in Green Bay Area Public schools, as well as students from Northeast Wisconsin in grades 7-12.

With this in mind, the school is designed to provide an innovative and supporting education setting for students, to increase graduation rates, as well as the overall career and college readiness by working collaboratively with Northeast Wisconsin Technical College and the University of Wisconsin-Green Bay.

N.E.W. Innovation will assure strong vocational education by incorporating career pathways and content into course work and student experiences. Students will benefit from individualized learning plans designed to ensure their needs are met and skill gaps identified are addressed continuously instead of waiting until the end of the semester or school year.

Mission

The mission of Northeast Wisconsin School of Innovation is to meet all students where they are at, guide them to where they need to be, and help them get to where they want to go.

Vision

Utilizing personalized learning and engaged citizenship, all students will be prepared to successfully transition to post-secondary school, the high demand careers of tomorrow, and become vital members of our community.

Additionally, the school’s academic and support systems will create an environment that fosters civic engagement. Each student will participate in Launch daily. Launch provides students an opportunity to start each day with nutrition, engage in meaningful conversation, and offer support and encouragement to peers. In addition, Launch eases students into school in a welcoming environment rather than an academic class. The principal, teachers, and support staff will create curricular activities to intentionally build an educational community to support student behavior, 21st century job skills, social emotional health and lifelong learning.

N.E.W. Innovation opened in the Fall of 2019. N.E.W. Innovation is the result of the Green Bay Area Public School District’s very successful pilot program, The Academy, which has been located at East High School and serves students at-risk of not graduating.

“It was not a lack of effort or support keeping our daughter from succeeding. However, for her it needed to be different. The program gave her everything she needed to start exactly where she was, and move forward. It provided the environment, the pace and the support necessary.”

— Parents of an Academy graduate
N.E.W. Innovation Students

N.E.W. Innovation is designed for the success of all students. In order to achieve this goal, N.E.W. Innovation is committed to meet every child at their current academic and social emotional level.

N.E.W. Innovation has structures in place to support students who:
- Need more time and supports to ensure an innovative education experience;
- Want to become engaged, independent, and self-directed learners;
- Have chosen and are committed to attend N.E.W School of Innovation and NWTC on Fridays as part of their education;
- Would benefit from a smaller personalized student-centered learning environment;
- Want opportunities to explore areas of passion or strengths;
- Have an adult, parent, and/or champion to support them;
- Demonstrate a mismatch between their ability and performance;
- Want learning to be meaningful to them and to engage in their community.

Proficiency-Based Learning Pathway

“How do students earn a high-school diploma?”

In a proficiency-based system, students earn their diploma by demonstrating mastery of skills and content. Mastery can be demonstrated through multiple venues, including (but not limited to) teacher-designed assessments, written papers, presentations, portfolios or projects. The specific requirements are determined by local policy, but must represent the content standards adopted by the Wisconsin Department of Instruction in the curriculum areas of:

- Literacy
- Mathematical content and practices
- Scientific inquiry and content knowledge
- Global citizenship
- Physical education
- Health
- Artistic/Technical expression
- Guiding principles

Our Four Guiding Principles

In addition to our subject graduation standards, our graduates will embody the following four guiding principles and transition to postsecondary life with the skills to be:

- A creative and practical problem solver, who recognizes a problem and uses their resources to find and test possible solutions. They use this problem-solving process to help them shape their beliefs and understanding of the world.
- A purposeful and effective communicator, who can write and speak clearly to a variety of audiences. Using technology, they enhance and share ideas effectively and respectfully.
- A responsible and engaged citizen, who recognizes how history has shaped their community while exploring ways to create a better world. They seek out and address injustice by understanding, respecting, and valuing diversity.
- A self-directed and lifelong learner, who continuously looks for opportunities to learn and grow by setting and achieving personal goals. They understand how to effectively learn and work with others.

Enrollment

As a charter school, parents and students must choose to attend the school through the District’s intra-district transfer process or open enrollment for non-district resident students.

Learn more about the intra-district process at [www.gbps.org/why_choose_gbps/intra-district_transfer](http://www.gbps.org/why_choose_gbps/intra-district_transfer).

The process for enrollment includes an orientation and completion of appropriate district enrollment forms. If interested in learning more about the unique programing that N.E.W. Innovation offers, please discuss with your school counselor or social worker, visit the school website at [https://newinnovation.gbps.org/](https://newinnovation.gbps.org/), and/or contact N.E.W. Innovation at (920) 272-7658.
ONLINE COURSES

The Green Bay Area Public School District provides middle and high school students the opportunity to take online courses. Classes in numerous content areas are currently accessed through the Wisconsin eSchool Network (WEN). The catalog of WEN courses is found at: http://wi.geniussis.com/publicstudentcourselist.aspx?id=56

Please note that a few courses in the WEN catalog may not be offered every term.

Classes are taught by licensed, Wisconsin-based teachers, delivered through the Internet and may be accessed from home or school computers. A Green Bay School District mentor offers support to foster student achievement.

The student’s school counselor submits referrals following an application and contract submission and with the recommendation of the home school’s Intervention/Consultation Team. Online high school credit courses are designed for students taking a course for the first time; online courses may not be taken for course repeats, credit recovery, or grade replacement. Credit is awarded for successful completion of each class. Enrollment may occur at almost any point in the school year and students are given a specified timeframe for course completion.

This option is designed to meet specific learning needs for students who are prepared to learn outside the conventional classroom. Online learning provides:

- Flexibility to facilitate a customized schedule designed to meet students’ individual goals.
- Access to courses not available at Green Bay high schools.
- Accelerated learning and enrichment for high achieving students.
- Approved coursework for non-traditional students and those with extenuating circumstances.

Student requests for online coursework should be directed to their school counselor. The characteristics, below, may be used by students, families, and school personnel in considering a student’s abilities for participation in online learning.

**Characteristics of Successful Online Learners**

- Proficient in use with computers, software, and Internet navigation.
- Self-motivated and learns well independently.
- Careful to allow ample time for the course.
- Effective time-managers.
- Careful to follow written information/directions for completing assignments.
- Good readers and writers.
- Consistent in communication with their teacher and district mentor.
- Problem solvers who ask for help when needed.
In AFNR, you will have the opportunity to pursue animal, plant, food or natural resource pathways. In plant sciences you will have the opportunity to work in the school greenhouse and learn about landscape design and how plants can be utilized to create spaces for client needs. In addition to plants, this pathway explores the production of food. It also looks at how natural resources can be developed, used, maintained, and managed for use in our society. Animal sciences provides you with the foundation you need to work with animals. You will learn about nutrition, disease, prevention and treatment, and how to work with and manage a wide variety of animals.

Career Opportunities:
Horticulturist, Agricultural Manager, Forester, Natural Resource Officer, Aquaculture Management, Veterinary Medicine, Biology, Wildlife Management and Resource Conservation

Potential to Earn: 📚 1 Industry Certification 🎓 14 College Credits

Every home, every business, and every structure is the product of skilled construction professionals. If you enjoy working with your hands and seeing the results of your work, this area may be for you. You’ll learn carpentry skills and remodeling techniques. You’ll have the chance to master a wide range of hand tools and power tools, read blueprints and building plans. From foundations to roofing, you’ll learn to create buildings that last for many years.

**Career Opportunities:**
Carpenter, Electrician, Mason, Construction Manager, Civil Engineer, Operating Engineers

DC – Dual Credit
Education

Inspiring young people is what this area is all about, as you get the opportunity to learn and work with kids. You will learn about all aspects of child development as well as how to create lessons for early childhood students. You have the opportunity to earn an early childhood assistant instructor certificate in this program to allow you to begin your career working in education. This foundation prepares you to continue your education if you’d like to be a primary teacher at any grade level.

Career Opportunities:
Child Care Teacher, Paraprofessional, Teacher, School Principal, Coach, Counselor

Potential to Earn: 🎓 1 Industry Certification  🎓 3+ College Credits

Engineering and robotics are essential in today’s manufacturing industry. A problem-solving mindset is foundational to the engineering field. You will learn how to step into the role of an engineer to develop solutions to problems by engaging in real-world problems. Students will explore engineering topics such as mechanisms, strength of structures and materials, and automation/robotics.

Career Opportunities:
Civil Engineer, Electrical Engineer, Mechanical Engineer, BioMedical Engineer, Industrial Engineer

Today's manufacturing is a combination of engineering and technology around precision machining and welding. Creating parts and products may require you to program a Computer Numeric Control (CNC) machine, or it may involve plasma cutting and welding. You will learn various types of welds and cutting operations, as well as fabrication, quality control, and weld testing. In the capstone course students have the opportunity to work in a fully functioning high school business, Bay Link Manufacturing®, building parts for companies. This is a high demand pathway offering students opportunities in many different industries.

**Career Opportunities:**
CNC Technician, Fabricator, Welder, Project Engineer

**AGR079425 - Appreciation of Animals and Animal Sciences**

Appreciation of Animals and Animal Sciences introduces students to the variety of ways animals influence our everyday lives. In this course you will explore the size and scope of domesticated companion, recreation and production animals' systems, and their interactions with the ecosystem or environment, the benefits of animal products to our mental and/or physical health, and the economic impact and influence the companion, recreation and production animal industries can have on our habits, behaviors, and actions. Care and management of a variety of animals, as well as understanding the science behind animal systems to maintain healthy animals is studied through hands-on activities.

**AGR079325 - Plant Science and Design**

This introductory plant science course is a hands-on approach to growing and maintaining a variety of plants in the home and yard. Budding career applications relating to the floricultural and horticultural industries will be explored. Lab-based applications in food production and sustainability practices will be completed. Some activities would include floral and landscape design, experiments with light and growing media, food production, growing plants, and plan related career and recreational exploration.

**AGR079225 - Wildlife Conservation and the Environment**

Wildlife and natural resource conservation are necessary to preserve and maintain our environment. The course explores a variety of wildlife species from deer and wolves to birds of prey, fish and waterfowl. Conservation topics range from natural resource preservation of land, water, and soil to animals, endangered species and forestry. Course participants learn hunting ethics, while hands on activities involve animal tracking, GPS, wildlife identification, fly tying and how to use a map and compass. The course includes practicing leadership skills/FFA and discussion of career opportunities in all related areas.

**AGR093625* - Agriscience/Life Skills**

This course gives students opportunities to participate in Agriscience activities using a modified curriculum. The Agriscience curriculum content as well as the instruction and assessment are modified. Activities will be designed to meet the individual needs of the students. Teacher recommendation is required.

*Note: Agriscience/Life Skills is offered on a rotating schedule and may not be available every year.*

*Note: As part of the IB Middle Years Programme at Franklin Middle School, all students develop and showcase their artistic talents as they participate in community/public events including a fine arts annual event. Student artists' work is displayed at WPS, a partner with Franklin Middle School since 1988.

### EXP061025 - Art Foundations

Art Foundations teaches the basic techniques and skills of art and challenges students to use higher order thinking skills and become creative problem solvers. Students will be introduced to the Elements and Principles of Art and Design, which are the building blocks of all works of art. They will learn about artistic concepts and techniques, which may include linear perspective, color theory, working with clay, shading to create the illusion of form, and understanding proportion. Students will apply their knowledge of art to design and produce quality two-dimensional and three-dimensional works, such as drawings, paintings, and sculptures, while demonstrating craftsmanship through appropriate use of materials, tools, and equipment.

*Note: Art Foundations meets every day for approximately seven weeks as part of a five-course rotation at Edison, Lombardi, Red Smith and Washington. It meets every other day for the full year at Franklin Middle School as part of the IB Middle Years Programme.

### ART078025 - Discovering Fine Art

In Discovering Fine Art, students continue to develop their knowledge and skills of the Elements and Principles of Art and Design and apply them in creating art that is to be appreciated for its imaginative, aesthetic, or intellectual nature. Students will have opportunities to experience a variety of art processes (drawings, paintings, and sculptures) while developing their individual styles and ability to creatively solve problems. Students will demonstrate their ability to respond, analyze, and interpret their own artwork and the work of others. This course will engage students in better understanding the arts, themselves, and our diverse world.

*Note: Discovering Fine Art is only offered at Franklin Middle School in Grade 7 and the course runs every other year at Aldo.

### ART067825 - Journey into Design

In Journey into Design, students continue to develop their knowledge and skills of the Elements and Principles of Art and Design and apply them in real world projects and assignments typical of the graphic design industry. Students will experience a variety of art processes (drawings, paintings, and sculptures) and begin to develop the ability to understand, interpret, and communicate with visual images and symbols. Students will demonstrate their ability to respond, analyze, and interpret their own artwork and the work of others. This course will engage students in exploring the role of art in the ever-changing workplace.

*Note: Journey into Design is only offered at Franklin Middle School in Grade 8 and the course runs every other year at Aldo.

### ART077125 - Integrated Visual Art

In Integrated Visual Art, students continue to develop their knowledge and skills of the Elements and Principles of Art and Design while integrating knowledge and concepts from core subjects into their artwork. Students will experience a variety of art media and processes (drawing, painting, sculpture, fiber arts, and printing) while developing their individual styles and ability to creatively solve problems. Students will demonstrate their ability to respond, analyze, and interpret their own artwork and the work of others. Students get a deeper level of learning through the integrated arts model as they engage in cross-curricular learning through combining knowledge gained in core subjects with visual arts.

### ART093225 - Art/Life Skills

This course gives students opportunities to have experiences with art using a modified curriculum. The Art curriculum content, as well as the assessment, is modified. Teacher recommendation is required.

*Note: Course is offered on a rotating schedule and may not be available every year.
**EXP062525***-Computer Literacy*
This course focuses on computer literacy skills for life-long learning while also integrating in topics of business. Course topics include, word processing, research skills, keyboarding, entrepreneurship and presentations.

*Note: Computer Literacy meets every day for approximately seven weeks as part of a five-course rotation at Edison, Lombardi, Red Smith and Washington.*

**BUS078125- Intro to Computer Science (PLTW) and Personal Finance**
This course will integrate business and computer-related skills using a variety of software and applications. We will explore the world of business and technology through hands-on units such as coding, personal finance, digital/graphics communications, and spreadsheets. The course will integrate the PLTW Computer Science 1 learning objectives. The skills and knowledge gained in this course will help to prepare for, and participate in, our ever-changing global economy.

**BUS078225- Business and Information Technology Development (PLTW)**
This is an innovative course designed to incorporate content that crosses the pathways of both business and computer science. Students will learn real-world skills through dynamic activities involving entrepreneurship, video editing, accounting/finance, coding, marketing, web design, and human resources/management. The course will utilize the PLTW Computer Science 2 learning objectives. This course is recommended for any 7th or 8th grade student with an interest in emerging technologies in business.

**BUS098725***- Computer Literacy/Life Skills*
This course is designed to teach computer literacy and life skills using an adapted curriculum. The goal for students is to acquire the computer skills necessary to enter and manipulate text and data. Emphasis will be on developing skills for personal use and future employment. Teacher recommendation is required.

**BUS081025- Computer Science 8**
This course focuses on foundational concepts and skills of computer science (CS). Students will shift from being the consumers to the creators of technology, and they will explore how to use the power of computers to solve big, real-world problems. Students will develop collaborative and creative skills while building their understanding of computing concepts using many unplugged and plugged activities and will apply their understanding through creative projects in multiple programming languages. Units included, but not limited to, computational thinking, block-based coding, app creation, Python coding, etc. This course is ever evolving and topics and units may fluctuate from year to year based on industry advancement and needs.

**BUS000625- Design 6**
**BUS000725- Design 7**
**BUS000825- Design 8**
As part of the IB Middle Years Programme (MYP), students at Franklin Middle School apply inquiry and problem-solving through computer and technology experiences that are integrated into core classes. The design cycle is used to structure the inquiry and analysis of problems, the development of feasible solutions, the creation of solutions, and the testing and evaluation of the solution. All components of the design cycle require and enhance students’ strategies for creative and critical thinking.

°This course is for students enrolled in the dual language program

### MID000621 - English Language Arts 6 Block

The purpose of the course is to prepare all students for college, career and community success. Reading units of study include: reading narratives, biographies, informational text, and poetry. Writing units of study include: short story, citing evidence when researching and writing a biography, developing an argumentative essay, and poetry. Across the units, students will analyze the language author’s use in mentor texts in order to expand their own understanding of language and writing. Students will practice the author's mentor language in their own speaking and writing. Students will explore craft, text structure, conventions and literary concepts through a variety of thinking strategies to comprehend, analyze and create text.

### MID00B621 - English Language Arts 6 Block (Bilingual)°

The purpose of the course is to prepare all students for college, career and community success. Reading units of study include: reading narratives, biographies, informational text, and poetry. Writing units of study include: short story, citing evidence when researching and writing a biography, developing an argumentative essay, and poetry. Across the units, students will analyze the language author’s use in mentor texts in order to expand their own understanding of language and writing. Students will practice the author's mentor language in their own speaking and writing. Students will explore craft, text structure, conventions and literary concepts through a variety of thinking strategies to comprehend, analyze and create text.

### FSE000611 - English Language Arts 6 Life Skills

The Life Skills option will emphasize the development of competence in the areas of career preparation, community participation, personal/social skills, and daily living skills.

### FSE000615 - Reading – Life Skills

An assessment is made of each student’s reading skills, and programming is implemented based upon the student’s needs.

### RDG090625 / SSE092025 - Supplemental Literacy 6

This course uses high-interest literature and direct instruction in reading, writing, and vocabulary skills to accelerate progress for those who have been challenged by reading and/or writing. The focus is on each student’s needs in order to help them become successful readers.

**Note:** Enrollment in this course is based on achievement data and teacher recommendation.
ENGLISH LANGUAGE ARTS

ENG071125- English Language Arts 7
ENG071125- English Language Arts 7 (Bilingual)

The purpose of the course is to prepare all students for college, career and community success. Units of study include: narrative short story, collecting relevant and sufficient evidence, developing an argument and historical writing. Across the unit’s students will analyze the language author’s use in mentor texts in order to expand their own understanding of language and writing. Students will practice the author's mentor language in their own speaking and writing. Students will explore craft, text structure, conventions and literary concepts through a variety of thinking strategies to comprehend deeply, analyze and create text.

ENG071325- Accelerated English Language Arts 7
Prerequisite - Teacher Recommendation

This course compacts learning expectations of 7th and 8th grade English Language Arts Curriculum. Students understand and create text for personal enrichment, inquiry, and problem solving. The student will integrate technology to complete various writing projects that include: literary non-fiction, a well-organized informational piece on a contemporary issue, an argumentative text that supports a claim debating a social need, and a multi-genre project about the Holocaust. The student is expected to read like an author and write with the reader in mind to build capacity and self-regulation for language arts.

FSE071125- English Language Arts 7 Life Skills

The Life Skills option will emphasize the development of competence in the areas of career preparation, community participation, personal/social skills, and daily living skills.

RDG090725 / SSE092025- Supplemental Literacy 7

This course uses high-interest literature and direct instruction in reading, writing, and vocabulary skills to accelerate progress for those who have been challenged by reading and/or writing. The focus is on each student's needs in order to help them become successful readers.

Note: Enrollment in this course is based on achievement data and teacher recommendation.

ENG082125- English Language Arts 8
ENG082125- English Language Arts 8 (Bilingual)

The purpose of the course is to prepare all students for college, career and community success. Units of study include: narrative short story, current events, collecting relevant and sufficient evidence, developing an argument and video presentation. Across the unit’s students will analyze the language author’s use in mentor texts in order to expand their own understanding of language and writing. Students will practice the author's mentor language in their own speaking and writing. Students will explore craft, text structure, conventions and literary concepts through a variety of thinking strategies to comprehend deeply, analyze and create text.

ENG082325**- Accelerated English Language Arts 8
1.0 High School Credits Prerequisite – Successful completion of Accelerated English Language Arts 7, and/or Teacher Recommendation

This course compacts learning expectations of 8th and 9th grade English Language Arts Curriculum. Students understand and create text for personal enrichment, inquiry, and problem solving. The student will integrate technology to complete various writing projects that include: analyzing and writing classical myths and fantasies that incorporate the classics with a modern-day twist narrative, exploring informational texts on timeless human issues, building a well-organized argument that establishes a claim and influences an audience, and a literary analysis of Shakespeare. The student is expected to read like an author and write with the task, purpose, and audience in mind in order to effectively communicate ideas. Students build capacity, transfer, and self-regulation in language arts.

*Note: Please see page 1 for information about high school credit for courses taken in middle school.

FSE082125- English Language Arts 8 Life Skills

The Life Skills option will emphasize the development of competence in the areas of career preparation, community participation, personal/social skills, and daily living skills.

RDG090825 / SSE092025*- Supplemental Literacy 8

This course uses high-interest literature and direct instruction in reading, writing, and vocabulary skills to accelerate progress for those who have been challenged by reading and/or writing. The focus is on each student's needs in order to help them become successful readers.

*Note: Enrollment in this course is based on achievement data and teacher recommendation.

**ELL001100- English Language Arts Level A Block**

This course is designed for new-to-the-country English Learners who are at the entering stages of developing English. The purpose of this course is to prepare all students for college, career, and community success. Throughout the course, students will learn how to communicate in English for social and instructional purposes in culturally appropriate ways while using high-interest literature to analyze the language author’s use in mentor texts in order to expand their own understanding of language and writing. Students will practice the author’s mentor language in their own speaking and writing. Students will explore craft, text structure, conventions, and literacy concepts through a variety of thinking strategies to comprehend deeply, analyze, and create text.

**ELL002100- English Language Arts Level B Block**

This course is designed for new-to-the-country English Learners who are at the emerging stages of developing English. The purpose of this course is to prepare all students for college, career, and community success. Throughout the course, students will learn how to communicate in English for social and instructional purposes in culturally appropriate ways while using high-interest literature to analyze the language author’s use in mentor texts in order to expand their own understanding of language and writing. Students will practice the author’s mentor language in their own speaking and writing. Students will explore craft, text structure, conventions, and literacy concepts through a variety of thinking strategies to comprehend deeply, analyze, and create text.

**ELL003100- English Language Arts Level C Block**

This course is designed for new-to-the-country English Learners who are at the developing stages of developing English. The purpose of this course is to prepare all students for college, career, and community success. Throughout the course, students will learn how to communicate in English for social and instructional purposes in culturally appropriate ways while using high-interest literature to analyze the language author’s use in mentor texts in order to expand their own understanding of language and writing. Students will practice the author’s mentor language in their own speaking and writing. Students will explore craft, text structure, conventions, and literacy concepts through a variety of thinking strategies to comprehend deeply, analyze, and create text.

**ELL001000- English Language Development**

The English Language Development (ELD) course is designed for new-to-the-country English Learners to develop academic language proficiency in English. This course is taken in conjunction with grade level English Language Arts. Students will participate in communication and both content and literature-based lessons. The course also incorporates small group designated ELD instruction for English learners at various proficiency levels. This small group instruction builds critical language skills into and from the English content and is focused on the WIDA ELD Standards.

**EXP062325- Exploring Family and Consumer Science**

This course explores topics related to Family and Consumer Science. Emphasis will be placed on life-long learning skills necessary to be a contributing member of a family and society. Projects will be related to foods, children, family dynamics, and consumerism.

*Note: Exploring Family and Consumer Science meets every day for approximately seven weeks as part of a five-course rotation at Edison, Lombardi, Red Smith and Washington.

**FCS075825- Flavors of Culinary Arts, Textiles/Design, and Child Development**

Have you ever wondered if you have what it takes to run your own restaurant? Could you be the next designer of the latest sportswear trends? Do you enjoy working with young children? Treat yourself to the latest “flavors” of culinary arts! Students will participate in food labs and menu design while learning safety and sanitation skills transferable to the world of work. Get a “taste” of fashion, interior and textile design as you explore hand and machine sewing techniques. You could also become a “seasoned” babysitter, childcare worker or coach as you discover the concepts of child development.

*Note: Flavors of Culinary Arts, Textiles/Design, and Child Development is only available during Grade 7 at Franklin Middle School.

**FCS076425- Flavors of Nutrition, Health Sciences, and Human Services (PLTW)**

Are you “craving” real world experiences? Do you have a “zest” for the field of medicine? Would you like a “taste” of what it is like to be a CSI? Students will be able to step into the shoes of a medical detective to explore how choices impact health for a lifetime. “Spice” up your knowledge of Nutritional Sciences, as you discover the importance of nutrients and participate in food labs. Friendship is on the “menu” in this course as we examine the importance of relationships, communication, family and self-concept. Join us for this enticing “course”!

*Note: Flavors of Nutrition, Health Sciences, and Human Services is only available during Grade 8 at Franklin Middle School.

**FCS080025- Flavors of Visual Arts in the Family and Consumer Sciences**

This course will engage students in exploring the role of art and design in career and technical education through the Family and Consumer Sciences. Students continue to develop their knowledge and skills of the elements and principles of art and design and apply them in real world activities in the culinary arts and textile services. They will experience a variety of art processes through food labs and menu design and fashion, interior, and textile design.

**FCS093325- Family and Consumer Science/Life Skills**

This course gives students opportunities to participate in activities related to Family and Consumer Science. The Family and Consumer Science curriculum content as well as the instruction and assessment are modified. Teacher recommendation is required.

**EXP062225*- Introduction to Health and Wellness**

This course is designed to introduce students to all areas of health and personal wellness. Students will examine various influences on their wellness choices, including society, the media, family, and peers. They will practice decision making skills and identify the consequences of their decisions. In addition, they will practice effective communication skills that will help them take greater personal responsibility for their health decisions. Emphasis is placed on how decisions they make today will have an effect on their future.

*Note:* Grade 6 Health meets every day for approximately seven weeks as part of a five-course rotation at Aldo, Edison, Lombardi, Red Smith and Washington. It meets every other day for the full year at Franklin Middle School as part of the IB Middle Years Programme and is integrated with P.E.

**HEA049025*- Health and Wellness**

1.0 High School Credits

The goal of Health and Wellness is to encourage all learners to move toward personal wellness by taking responsible actions and making well-informed decisions. Students will learn how effective communication, decision-making, and goal setting skills are essential to help them identify, adapt, and maintain healthy behaviors. They will practice skills for expressing feelings in clear, respectful ways and learn how to access accurate information to guide decisions. Students will use advocacy skills to promote healthy norms and behaviors for themselves and others. They will learn and practice these skills by discussing the topic areas of wellness, mental health, substance abuse prevention, first aid, human growth and development, and nutrition.

**Note:** Please see page 1 for information about high school credit for courses taken in middle school.

**Note:** Watch for parent letter regarding Human Growth and Development unit.

### MID000625 - Mathematics 1

In this course students will: (1) use reasoning about multiplication and division to solve ratio and rate problems; (2) use the meaning of fractions, the meanings of multiplication and division, and the relationships between multiplication and division to understand and explain why the procedure for division of fractions make sense; (3) understand the use of variables in mathematical expressions and equations to describe the relationships between quantities; and (4) begin to develop their ability to think statistically.

### FSE000625 - Mathematics 1 – Life Skills

The Life Skills option emphasizes development in mathematical operations and relationships.

### MTH090625 / SSE091025 - Supplemental Mathematics 6

Enrollment in this course is based on achievement data and teacher recommendation. This course uses small group and individual instruction in order to accelerate progress for those who have been challenged by mathematics. Classroom activities are student-centered, emphasizing concrete mathematical experiences and active learning. The focus is on each student's needs in order to help them to become proficient mathematicians.

### MTH072325- Mathematics 2

In this course students will: (1) extend their understanding of ratios and develop an understanding of proportionality; (2) will develop an understanding of various representations of rational numbers (fractions, decimals, percent’s, negative numbers) and their contexts; (3) solve geometric problems involving scale drawings, informal geometric constructions, area, surface area, and volume; and (4) learn to draw inferences about populations based on samples.

### FSE072325- Mathematics 2 - Life Skills

The Life Skills option emphasizes development in mathematical operations and relationships.
MATHEMATICS

MTH090725 / SSE091025 - Supplemental Mathematics 7
Enrollment in this course is based on achievement data and teacher recommendation. This course uses small group and individual instruction in order to accelerate progress for those who have been challenged by mathematics. Classroom activities are student-centered, emphasizing concrete mathematical experiences and active learning. The focus is on each student's needs in order to help them to become proficient mathematicians.

MTH073325* - Accelerated Mathematics 7
Prerequisite - Teacher Recommendation
In Accelerated Mathematics 7, students will learn content from both the 7th and 8th grade math curriculum. Compared to a traditional Math 7 course, this course demands a faster pace for instruction and learning. Students will increase their understanding from the 6th grade on proportional relationships, equations, and positive and negative numbers. These topics will remain a major emphasis throughout the middle school years and into high school. A good command of rates and proportional relationships, including percentages, is also an important life skill. Students who successfully complete this course will complete Algebra 1 in 8th grade.

In this course students will: (1) develop an understanding of operations with rational numbers and integers and work with expressions and equations; (2) use equations and systems of equations to represent, analyze, and solve a variety of problems; (3) understand the effects of geometric transformation to solve problems involving scale drawings, informal geometric constructions, area, surface area, and volume; and (4) learn to draw inferences about populations based on samples.

MTH083625 - Mathematics 3
In this course students will: (1) formulate and reason about expressions and linear equations, including modeling relationships, solving equations, and exploring systems of linear equations; (2) understand functions as representations of rules; and (3) analyze two- and three-dimensional space and figures using geometric and algebraic concepts.

FSE083625 - Mathematics 3 - Life Skills
The Life Skills option emphasizes development in mathematical operations and relationships.

MTH090825 - Supplemental Mathematics 8
Enrollment in this course is based on achievement data and teacher recommendation. This course uses small group and individual instruction in order to accelerate progress for those who have been challenged by mathematics. Classroom activities are student-centered, emphasizing concrete mathematical experiences and active learning. The focus is on each student's needs in order to help them to become proficient mathematicians.

MTH072825 - Algebra 1
1.0 High School Credits
Prerequisite – Successful completion of Accelerated Mathematics 7, and/or Teacher Recommendation
In this course students will develop a deep and extended understanding of linear, exponential and quadratic functions. They will apply, compare and contrast these functions as well as examine methods for solving and analyzing them. Univariate and bivariate statistics topics will also be explored. Successful completion of this course will fulfill the first entry level mathematics course requirements for most four-year colleges and two-year technical colleges.

**Note: Please see page 1 for information about high school credit for courses taken in middle school.

MTH089125*** - MYP 4: Integrated Algebra 1 and Geometry
1.0 High School Credits
Prerequisite – Successful completion of Accelerated Mathematics 7, and/or Teacher Recommendation
Integrated Algebra 1 and Geometry is aligned with the International Baccalaureate Middle Years Programme. It is an integrated algebra 1, geometry and algebra 2 course. Some of the specific content explored in this course include graphical analysis, proportionality, quadratics and radical functions. MYP 4 encourages students to see mathematics as a tool for solving problems in an authentic real-life context. Students are expected to transfer theoretical mathematical knowledge into real-world situations and apply appropriate problem-solving strategies, draw valid conclusions and reflect upon their results. MYP 4 is a continuation of the PYP and MYP math courses and is a gateway to advanced course work of the IB Diploma Programme math and sciences. MYP 4 is the first of a two-year math series to culminate with MYP 5.

**Note: Please see page 1 for information about high school credit for courses taken in middle school.
**MID078725 - Exploring STEM**
This course is for students who are interested in hands-on applications of science, technology, engineering, and math (STEM). Students will explore and investigate topics such as engineering and design; flight and motion; psychology; crime scene investigation and technology tools. They will have opportunities to develop not only their science and math skills, but also their skills in teamwork, communication, creativity, and critical thinking.

**ADDITIONAL MATHEMATICS AT LEONARDO DA VINCI**

**MTH082825 - Geometry**
1.0 High School Credits
Prerequisite – Successful completion of Algebra 1
In this course, students will explore complex geometric situations and deepen their explanations of geometric relationships, moving toward formal mathematical arguments in a variety of formats. Topics will include congruence and similarity of geometric figures, the right triangle trigonometry, cross sections and rotations, coordinate geometry, and circles. Other topics will include the computation and interpretation of probabilities. Successful completion of this course will fulfill the second entry-level mathematics course requirement for most four-year colleges and two-year technical colleges.

**MTH044825 - Algebra 2 for Pre-Calculus**
1.0 High School Credits
Prerequisite – Successful completion of Geometry
This course will deepen and expand the understanding of algebraic concepts. New topics introduced include complex numbers, conic sections, and polynomial, logarithmic, and trigonometric functions. This course will primarily utilize direct instruction, though students will be expected to use multiple representations to deepen their understanding of advanced algebraic concepts and models. Graphing calculators will be utilized in this course. Successful completion of this course will fulfill the third entry-level mathematics course requirements for most four-year colleges and two-year technical colleges.

**MTH044925 - Pre-Calculus**
1.0 High School Credits
Prerequisite – Successful completion of Algebra 2 for Pre-Calculus
Students will deepen their knowledge of a wide variety of functions to include analysis of key characteristics, transformations, and mathematical manipulation. Students will be introduced to topics needed for post-secondary study such as vectors, limits and conic sections.

**ELL300130 - EL Intensive Mathematics/Enrichment (Double Block)**

This course is for new-to-the-country English Learners (ELs) with very limited math proficiency. This intensive course is designed to accelerate math acquisition and close the achievement gap for ELs with limited formal schooling. The curriculum covers the Mathematics standards and content from grades K-5. Teachers will differentiate instruction for students who are at various levels of math proficiency.

**ELL000625 - EL Mathematics 1**

This course provides the Grade 6 Mathematics 1 course concepts and skills to new-to-the-country English Learners, who will (1) use the language of mathematics for various purposes and participate in academic conversations to foster a more thorough understanding of the English language; (2) use reasoning about multiplication and division to solve ratio and rate problems; (3) use the meaning of fractions, the meanings of multiplication and division, and the relationships between multiplication and division to understand and explain why the procedure for division of fractions make sense; (4) understand the use of variables in mathematical expressions and equations to describe the relationships between quantities; and (5) begin to develop their ability to think statistically.

**ELL090625-EL Supplemental Mathematics 6**

Enrollment in this course is based on achievement data and teacher recommendation. This course uses small group and individual instruction in order to accelerate progress for new-to-the-country English Learners who have been challenged by mathematics. Classroom activities are student-centered, emphasizing concrete mathematical experiences and active learning. The focus is on each student’s needs in order to help them to become proficient mathematicians.

**ELL072325 - EL Mathematics 2**

This course provides the Grade 7 Mathematics 2 course concepts and skills to new-to-the-country English Learners, who will (1) use the language of mathematics for various purposes and participate in academic conversations to foster a more thorough understanding of the English language; (2) extend their understanding of ratios and develop an understanding of proportionality; (3) will develop an understanding of various representations of rational numbers (fractions, decimals, percents, negative numbers) and their contexts; (4) solve geometric problems involving scale drawings, informal geometric constructions, area, surface area, and volume; and (5) learn to draw inferences about populations based on samples.

**ELL090725-EL Supplemental Mathematics 7**

Enrollment in this course is based on achievement data and teacher recommendation. This course uses small group and individual instruction in order to accelerate progress for new-to-the-country English Learners who have been challenged by mathematics. Classroom activities are student-centered, emphasizing concrete mathematical experiences and active learning. The focus is on each student’s needs in order to help them to become proficient mathematicians.
MATHEMATICS – English Learner (EL)

**ELL083625- EL Mathematics 3**
This course provides the Grade 8 Mathematics 3 course concepts and skills to new-to-the-country English Learners, who will (1) use the language of mathematics for various purposes and participate in academic conversations to foster a more thorough understanding of the English language; (2) formulate and reason about expressions and linear equations, including modeling relationships, solving equations, and solving systems of linear equations; (3) understand functions as representations of rules; and (4) analyze two- and three-dimensional space and figures using geometric and algebraic concepts.

**ELL090825- EL Supplemental Mathematics 8**
Enrollment in this course is based on achievement data and teacher recommendation. This course uses small group and individual instruction in order to accelerate progress for new-to-the-country English Learners who have been challenged by mathematics. Classroom activities are student-centered, emphasizing concrete mathematical experiences and active learning. The focus is on each student’s needs in order to help them to become proficient mathematicians.
# MUSIC - BAND

Students Must Select a Music Course in Grade 6
Grade 7 and 8 students are able to take more than one course in Music.

*Note: Music is required in Grade 6. Students must choose one Music course from any Grade 6 Music Offering.

Note: Students may need to rent or purchase an instrument from outside of school. Musical instruments and other articles may be transported by the students as long as they do not block the bus aisles or take up seating space.

Note: Regular individual practice is expected. Performances will be required outside of the school day.

**MUS063625 (Grade 6)** - Beginning Band
**MUS073625** (Grades 7/8) - Beginning Band
In band courses, students will learn to play woodwind, brass, and percussion instruments. Beginning Band is for students who do not have prior experience in band, students needing additional development of foundational skills, and/or students who are switching instruments. Students will continue to develop their music literacy skills and be introduced to proper techniques for performing on a selected instrument.

**MUS063725** - Band 1
**Prerequisite:** completion of beginning band program or equivalent
Band 1 is for students who have prior experience on a woodwind, brass, or percussion instrument. Students will continue to develop their music literacy skills and proper techniques on a selected instrument. Additionally, students will develop ensemble skills.

**MUS073725** - Band 2
**Prerequisite:** prior experience on a woodwind, brass, or percussion instrument
In Band 2, students will continue to develop their musical literacy, ensemble skills, and technical skills on a woodwind, brass, or percussion instrument in a large group setting. Students will perform music that encompasses a variety of styles, historical backgrounds, and technical demands.

**MUS074725** - Band 3
**Prerequisite:** Completion of Band 2 or equivalent prior experience on a woodwind, brass, or percussion instrument
In Band 3, students will continue to develop their musical literacy, ensemble skills, technical skills, and independent musicianship skills on a woodwind, brass, or percussion instrument in a large group setting. Students will perform music that encompasses a variety of styles, historical backgrounds, and technical demands.
### MUSIC - CHOIR

**Students Must Select a Music Course in Grade 6**

*Grade 7 and 8 students are able to take more than one course in Music.*

</tbody>
</table>

*Courses are offered to students in Grade 6 regardless of their musical background. They continue to develop their knowledge of music fundamentals as they learn vocal technique and part-singing. Students will sing music of various styles and genres in large and small group settings.

**MUS063525**: Choir 6*

Choir 6 is available to students regardless of their musical background. They continue to develop their knowledge of music fundamentals as they learn vocal technique and part-singing. Students will sing music of various styles and genres in large and small group settings.

**MUS064025**: Tenor/Bass Choir

This course gives students the opportunity to enhance their technical and expressive vocal skills. Students will continue to develop their abilities in vocal technique, part-singing, and music fundamentals. They will sing music of various styles and genres in large and small group settings.

**MUS064125**: Treble Choir

This course gives students the opportunity to enhance their technical and expressive vocal skills. Students will continue to develop their abilities in vocal technique, part-singing, and music fundamentals. They will sing music of various styles and genres in large and small group settings.

**MUS074225**: Mixed Choir

This Mixed Choir gives students the opportunity to continue developing their technical and expressive skills using increasingly complex repertoire in a mixed-voice ensemble. Students will continue to refine their abilities in vocal technique, part-singing, and music fundamentals. They will sing music of various styles and genres in large and small group settings.

**MUS080125**: Tenor/Bass Choir 2

These courses give students the opportunity to continue developing their technical and expressive skills using increasingly complex repertoire in a gender-specific ensemble. Students will continue to refine their abilities in vocal technique, part-singing, and music fundamentals. They will sing music of various styles and genres in large and small group settings.

**MUS080225**: Treble Choir 2

*Note: These courses may be offered as a voice-specific or as a mixed choir depending on enrollment.

**Note**: Tenor/Bass Choir signs music usually written on the bass clef (lower notes). Treble Choir signs music usually written on the treble clef (higher notes). If you have questions about which choir to enroll in, please ask the choir teacher or your school counselor.

Note: Performances will be required outside of the school day.
# MUSIC - GENERAL

Students Must Select a Music Course in Grade 6

Grade 7 and 8 students are able to take more than one course in Music.

</tbody>
</table>

*Note: Music is required in Grade 6. Students must choose one Music course from any Grade 6 Music Offering.

**MUS063025** - General Music 6

In this class, students will learn music appreciation, critical listening, and recognizing the role of music in society. They will study traditional, historical, and modern music from Western and World Music traditions. Students will learn about and use musically relevant criteria to analyze and evaluate performances and individual work. Activities will include opportunities to engage in a variety of listening activities and discussions so students can understand and develop their personal tastes in music.

**MUS093525** - Music/Life Skills

This course gives students opportunities to have experiences with music using a modified curriculum. The Music curriculum content, as well as the assessment, is modified. Teacher recommendation is required.

*Note: Course is offered on a rotating schedule and may not be available every year.

**MUS046525** - Popular Music Workshop

Students in this course will have the opportunity to play the electric guitar, keyboard, and percussion instruments while learning about world music and pop culture. This course is open to all students who enjoy music and want to expand their learning in the Fine Arts area without concert performance or required practice outside of class time. Concert performances are not required in this course. No outside practice is required.

*Note: This course may be taken again if previously taken in 7th grade.

*Note: This does NOT fulfill the Art requirement of IB MYP at Franklin Middle School.

**EXP063325** - World Drumming

In this course, students will be introduced to hand drumming techniques and traditions from multiple world regions. Students will study the music of multiple cultures, including African, Central and South American, Middle Eastern, Indonesian, and Native American. They will continue to develop their ability to read and improvise music individually and with an ensemble.
MUSIC - ORCHESTRA

Students Must Select a Music Course in Grade 6
Grade 7 and 8 students are able to take more than one course in Music.

</tbody>
</table>

*Note: Music is required in Grade 6. Students must choose one Music course from any Grade 6 Music Offering.

Note: Regular individual practice is expected. Performances will be required outside of the school day.

**MUS063825 - Beginning Orchestra**
In orchestra courses, students will learn to play an orchestral string instrument: violin, viola, cello, or string bass. Beginning Orchestra is for students who do not have prior experience in orchestra, students needing additional development of foundational skills, and/or students who are switching instruments. Students will continue to develop their music literacy skills and be introduced to proper techniques for performing on a selected instrument.

**MUS063925 - Orchestra 1**
*Prerequisite: completion of beginning orchestra program or equivalent*
Orchestra 1 is for students who have prior experience on an orchestral string instrument (violin, viola, cello, or string bass). Students will continue to develop their music literacy skills and proper techniques on a selected instrument. Additionally, students will develop ensemble skills.

**MUS073925 - Orchestra 2**
*Prerequisite: Prior experience on a string instrument*
In Orchestra 2, students will continue to develop their musical literacy, ensemble skills, and technical skills on an orchestral string instrument (violin, viola, cello, or string bass) in a large group setting. Students will perform music that encompasses a variety of styles, historical backgrounds, and technical demands.

**MUS074825 - Orchestra 3**
*Prerequisite: Completion of Orchestra 2 or equivalent prior experience on a string instrument*
In Orchestra 3, students will continue to refine their musical literacy, ensemble skills, technical skills, and independent musicianship skills on an orchestral string instrument (violin, viola, cello, or string bass) in a large group setting. Additionally, they will also begin to develop leadership skills in large and small group settings. Students will perform music that encompasses a variety of styles, historical backgrounds, and technical demands.

**OTH008925- Aldo Leopold Community School Capstone Project**

The Capstone Project is a culminating experience where Aldo Leopold Community School eighth graders examine and use all the facets of their education and experiences from their time as an Aldo student. Students will demonstrate what it means to be a community member and explore their world through creative problem solving and interaction. They will learn how city government works, the role of business and non-profits in a community, how to make personal financial decisions, and the impact on the larger community. A film and speaker series engages students in discussions around contemporary issues. Students will create and run their own business in a simulated city for other students and guests to visit at the end of the year.

**MID079025- AVID 7 (Advancement Via Individual Determination)**

**MID089025- AVID 8 (Advancement Via Individual Determination)**

AVID is an elective class which seeks to prepare students to do well in rigorous classes like advanced mathematics, advanced language arts and other college preparatory courses in middle and high school and gain admission to and be successful in college. Students learn strategies for success such as goal setting, time management, Cornell note taking and organization, and develop college awareness through campus visits and guest speakers. The AVID curriculum focuses on WICOR – Writing (expository and timed writing), Inquiry (high level questioning), Collaboration (group projects and tutorials), Organization and Reading (critical reading of a variety of texts).

**MIDB79025- AVID Excel 7 (Advancement Via Individual Determination)**

**MIDB89025- AVID Excel 8 (Advancement Via Individual Determination)**

AVID Excel is an accelerated pathway into high school that provides English Learners the tools and support to take control of their schooling and plan their pathway to college and careers. The courses focus on six learning strands - reading, writing, oral language, academic vocabulary, study skills, and self-determination and leadership - that help to accelerate language acquisition, increase overall achievement, and give students access to rigorous coursework.

**OTH000025- MYP Community Project**

As part of the IB Middle Years Programme (MYP), students in Grade 8 at Franklin Middle School complete a Community Project. The community project focuses on community and service, encouraging students to explore their interests and realize the contributions and differences they make in their community. Community projects enable students to engage in practical explorations through a cycle of inquiry, action, and reflection. The community project helps students develop the attributes of the IB learner profile, approaches to learning skills, and become independent, lifelong learners. Students are supported throughout their community project from their supervisor and the MYP coordinator.
OTHER COURSE OPTIONS

OTH006325- MYP Interdisciplinary Units 6
OTH007325- MYP Interdisciplinary Units 7
OTH008325- MYP Interdisciplinary Units 8

Interdisciplinary learning is a key feature of the IB Middle Years Programme. At Franklin, two subjects come together once a year to purposefully integrate their content into a unit that makes meaningful connections. Through interdisciplinary units, students are empowered to integrate the disciplines in novel and creative ways. These units help students make connections between disciplines to develop new understanding, create products, or address real-world issues in ways that would have been unlikely through a single subject approach.

EXP063525- Personalize Your Path

In sixth grade, students will learn how school prepares them for the future as they begin exploring careers, career clusters, and pathways/programs of study that match their learning styles, interests, values, and skills. Students will begin to learn how academic achievement impacts future goals, as well as what options they have to further explore career interests in middle school and high school, to best prepare them for the future.

ELL000136*- EL Resource 1 (meets every day – all year)
ELL000146*- EL Resource 2 (meets every day – all year)

The EL Resource course is designed for English Learner students who will use language for various purposes and tasks. Students will participate in academic conversations and literacy activities to foster a more thorough understanding of the English language. Teacher recommendation is required.

*Note – These courses are offered on a rotating schedule. Only one course will be offered each year.

ELL000138- Excel Strategies 7
ELL000148- Excel Strategies 8

Excel Strategies provides English Learners support for accelerated language acquisition. Students will develop skills in reading, writing, oral language, academic vocabulary, study skills, and self-determination and leadership.

SOC093525- Exploring Choices and Challenges

This course works with students to effect long-term change in the cognitive-behavioral area. It is designed to teach strategies for decision making, evaluating life choices, managing anger and implementing corrective thinking processes.
Internet Version

**MID099525- Navigating Social Dynamics**
The purpose of this course is to effect long-term change in the area of social thinking. The course involves understanding of specific social cognitive challenges and learning how to use strategies to compensate for these challenges in the real world. Emphasis is on personal problem solving, conversation skills, initiating interactions, perspective taking, and abstract thinking.

**SSE009000-Resource (every day)**
**SSE009003-Resource (every other day)**
Resource is designed to provide students with individualized support and assistance to be able to participate and progress in the regular classroom general education curriculum.

**PED061025- Physical Education 6**
In middle school, students use and continue to develop the skills learned in elementary school and apply them in games and fitness activities. Sixth graders will emphasize skill development and be introduced to concepts of game play. They will learn the rules and basic principles of a variety of individual and group activities and games, which they will build upon in future years. Students will work with a diverse population and be willing to accept feedback to accomplish group goals. Students will be introduced to fitness concepts and begin to understand how they may be applied to a lifetime of personal fitness.

**PED071025- Physical Education 7**
In middle school, students use and continue to develop the skills learned in previous grades and apply them in games and fitness activities. Seventh graders will continue to develop their skills, while emphasizing strategies and tactics of game play. They will continue to apply the rules and principles in a variety of individual and group activities and games. Students will work with a diverse population and be willing to give and accept feedback to accomplish group goals. Students will continue to examine fitness concepts and begin to make informed decisions for a lifetime of personal fitness.

**PED081025- Physical Education 8**
In middle school, students use and continue to develop the skills learned in previous grades and apply them in games and fitness activities. Eighth graders will refine their skills, as well as the strategies and tactics of game play. They will consistently apply the rules and principles in a variety of individual and group activities and games. Students will promote positive social interactions with a diverse population to accomplish group goals. Students will continue to examine fitness concepts and apply them to make informed decisions for a lifetime of personal fitness.

**PED093125* - Adaptive Physical Education**
This course gives students opportunities to explore various areas of recreation using a modified curriculum. The Physical Education curriculum content as well as the assessment is modified. Teacher recommendation is required.

*Note: Course is offered on a rotating schedule and may not be available every year.*

°This course is for students enrolled in the dual language program

**MID000613- Physical Science**

**MID00B613- Physical Science (Bilingual)°**

This is a lab course that introduces students to the most fundamental concepts from physics and chemistry including matter, energy, motion and forces and waves. The course will explore the central questions related to physical science. For example, how do atomic and molecular interactions explain the properties of matter that we see and feel? How can one describe physical interactions between objects and within systems of objects? How can energy be transferred from one object or system to another? What are the characteristic properties of waves and how can they be used?

There is a focus on performance that includes developing and using models, planning and conducting investigations, analyzing and interpreting data, and constructing explanations. Students are also expected to demonstrate understanding of engineering practices.

**FSE000613- Physical Science Life Skills**

The Life Skills option will emphasize development of competence in the areas of career preparation, community participation, personal/social skills, and daily living skills. The general education curriculum will be expanded to focus on the functional academic skills.

**SCI071325- Life Science**

**SCIB71325- Life Science (Bilingual)°**

This is a lab course that introduces students to the most fundamental ideas in biology including cells, genetics, body systems, evolution, and ecology. The course will focus on the following central concepts of the biological science: an exploration of the ways cells contribute to the function of living organisms; a system of how living and non-living things operate to meet the needs of organisms in an ecosystem; how living organisms pass traits from one generation to the next; and how organisms evolve over time in response to changes in the environment.

There is a focus on performance that includes developing and using models, planning and conducting investigations, analyzing and interpreting data, and constructing explanations. Students are also expected to demonstrate understanding of engineering practices.

*Note: Life Science and Earth and Space Science are offered every other year at Aldo Leopold and Leonardo Da Vinci*
SCIENCE

FSE071325- Life Science Life Skills
The Life Skills option will emphasize development of competence in the areas of career preparation, community participation, personal/social skills, and daily living skills. The general education curriculum will be expanded to focus on the functional academic skills.

SCI082325- Earth and Space Science
SCI82325- Earth and Space Science (Bilingual) °
In this inquiry-based course that utilizes labs and projects, you will explore the central questions related to the Earth and Space Sciences. For example, how do the materials in and on Earth’s crust change over time including the influence of tectonic plate movement? How does the interaction of celestial bodies affect Earth’s place in the universe and solar system? How do people figure out that the Earth and life on Earth have changed through time? How do human activities affect Earth’s geosystems? What factors interact and influence weather, climate, and Earth’s changing surface?

There is a focus on performance that includes developing and using models, planning and conducting investigations, analyzing and interpreting data, and constructing explanations. Students are also expected to demonstrate understanding of engineering practices.

Note: Life Science and Earth and Space Science are offered every other year at Aldo Leopold and Leonardo Da Vinci.

FSE082325- Earth and Space Science Life Skills
The Life Skills option will emphasize development of competence in the areas of career preparation, community participation, personal/social skills, and daily living skills. The general education curriculum will be expanded to focus on the functional academic skills.

MID078725- Exploring STEM
This course is for students who are interested in hands-on applications of science, technology, engineering, and math (STEM). Students will explore and investigate topics such as engineering and design; flight and motion; psychology; crime scene investigation and technology tools. They will have opportunities to develop not only their science and math skills, but also their skills in teamwork, communication, creativity, and critical thinking.

*This course is for students enrolled in the dual language program

**MID000635 - United States History Survey**

**MIDB00635 - United States History Survey (Bilingual) °**

In United States History Survey, students will study the creation of the United States of America from its roots as a British colony to an independent, industrial nation. Students will investigate Native American cultures, colonization and colonial growth, United States independence, developing a new nation, the westward movement, the Civil War and industrialization, through close reading of primary and digital sources, collaborative discussion, and inquiry. The causes and effects of events that shaped our nation will be explored.

**FSE000635 - United States History Survey Life Skills**

This course develops an understanding of geographical concepts, map skills and civic responsibilities. Students will have the opportunity to explore other countries and determine how geography, location, and resources have influenced and continue to influence people’s lives. Students will experience cultural customs and traditions of countries other than the U.S. Current events are studied on an on-going basis.

**MIDB00645 - Cultura Latina (Latinx Culture) °**

This course provides students in the bilingual pathway the opportunity to gain a more robust understanding of the history and culture of the Latinx community in the United States. Students will learn how the richness of this culture comes from the historical and geographic diversity of its people. They will study current social issues impacting the Latinx community and develop the knowledge and skills to be agents of change within their communities.

**SOC071625 - World Cultures and Geography**

**SOCB071625 - World Cultures and Geography (Bilingual) °**

In World Cultures and Geography, students will study the regions of the world from a global perspective. They will explore the regions of Latin America, Europe, Asia, and Africa through the lenses of geography, history, government, economics and culture. Students will examine the interconnectedness of the regions of the world and develop an understanding of how we live in a global society.

**FSE071625 - World Cultures and Geography - Life Skills**

This course develops an understanding of geographical concepts, map skills and civic responsibilities. Students will have the opportunity to explore other countries and determine how geography, location, and resources have influenced and continue to influence people’s lives. Students will experience cultural customs and traditions of countries other than the U.S. Current events are studied on an on-going basis.
In Early Civilizations, students will investigate the development of ancient and pre-modern civilizations and the legacies that are left behind. Students will examine the commonalities between ancient civilizations, considering geographical impact, culture, leaders and legacies. The development and decline of civilizations including Mesopotamia, Egypt, India, China, Greece, Rome, the Middle East, Africa, and the Americas will be explored.

This course develops an understanding of geographical concepts, map skills and civic responsibilities. Students will have the opportunity to explore other countries and determine how geography, location, and resources have influenced and continue to influence people’s lives. Students will experience cultural customs and traditions of countries other than the U.S. Current events are studied on an on-going basis.

*Note: These Sheltered English courses are offered on a rotating schedule. Only one course will be offered each year.*

**ELL000635- EL United States History Survey**
This course is designed for new-to-the-country English Learner students who will use the language of social students for various purposes while investigating the creation of the United States of America from its roots as a British colony to an independent, industrial nation. Students will investigate; Colonial growth, United States independence, developing a new nation, the Westward Movement, the Civil War and Industrialization, through close reading of primary and digital sources, collaborative discussion, and inquiry. The causes and effects of events that shaped our nation will be explored. Students will demonstrate learning through common assessments designed to measure student proficiency of essential concepts.

**ELL0712625—EL World Cultures and Geography**
This course is designed for new-to-the-country English Learner students who will use the language of social students for various purposes while investigating the world from a global perspective. Students will examine regions of Latin America, Europe, Asia, and Africa through the lens of geography, history, government, economics, and culture. Students will examine the interconnectedness of the regions of the world and develop an understanding of how we live in a global society. Students will demonstrate learning through common assessments designed to measure student proficiency of essential concepts.

**ELL082625—EL Early Civilizations**
This course is designed for new-to-the-country English Learner students who will use the language of social students for various purposes while investigating the rise and fall of ancient civilizations and the legacies that are left behind. Students will examine the commonalities between ancient civilizations, considering geographical impact, culture, leaders and legacies. The development and decline of civilizations including Mesopotamia, Egypt, India, China, Greece, Rome and the Americas will be explored. Students will demonstrate learning through common assessments designed to measure student proficiency of essential concepts.

**EXP062425** - Exploring Technology
This is an exciting, beginning class that emphasizes the improvement of problem-solving skills. You will work on mini modules such as robotics, flight, electricity, mechanical reasoning and pneumatics. Students will also spend class time in the lab using a variety of tools and machines to complete projects made of metal, plastic and wood. Problem-solving skills will be emphasized.

*Note: Introduction to Technology meets every day for approximately seven weeks as part of a five-course rotation at Edison, Lombardi, Red Smith and Washington.

**TED077125** - Construction and Manufacturing
In this course students will use computers, hand tools, power tools and machines. Challenging activities will include the design, construction, and evaluation of structures, and mass-produced and individually designed products made of wood, metal, plastic and other material. Teamwork, problem-solving skills, and career exploration will be stressed in a safety conscious environment.

**TED077625** - Robotics and Engineering
Students will discover the design process and develop an understanding of the influence of creativity and innovation in their lives. They are then challenged and empowered to use and apply what they’ve learned throughout the units such as: Transportation, 3D CAD software, and 3D printing. Students will also learn about mechanical systems, energy transfer, machine automation, and computer control systems. Students use the VEX Robotics® platform to design, build, and program real-world objects. Teamwork, problem solving skills and career exploration will be emphasized in all areas of this class.

**TED077325** - Pathway to Engineering (PLTW)
This course is designed to teach problem solving and pre-engineering skills as well as integrate other STEM classes – mathematics, science, and technology. The GTT program helps students develop and hone skills in middle school that enable them to enter the high school program with foundation knowledge and skills for success in pre-engineering courses. Different aspects of this course deal with the design process, sketching/drawing techniques, 3D CAD drawings, energy type and forms, automation and robotics.

*Note: Pathway to Engineering (PLTW) is only available during Grade 7 and 8 at Lombardi Middle School.

**TED077425** - Advanced Pathway to Engineering
**Prerequisite – Pathway to Engineering**
This course is a specialized class that builds off of the Pathway to Engineering course. This gives the students a chance to advance their acquired knowledge and skill in problem solving, team work, and innovation as well as exploring STEM. The class will achieve this through the study of both Green Architecture (GA) and Robotics. This class is designed to prepare students for the transition to high school.

*Note: Advanced Pathway to Engineering is only available during Grade 8 at Lombardi Middle School.
TECHNOLOGY EDUCATION

TED077525* - Pathway to Manufacturing
This is a hands-on course designed to introduce 8th grade students to the various techniques related to the metal manufacturing process. Students will develop basic understanding and skills necessary to weld, machine, fabricate, and finish their work. Students will be actively engaged in projects while being prepared for the Southwest High School Welding Program or Bay Link Manufacturing at West High School.

*Note: Pathway to Manufacturing is only available during Grade 8 at Lombardi Middle School.

TED093425* - Technology Education/Life Skills
This course is designed to give students opportunities to experience the field of Technology and Engineering, using a modified curriculum. This class will offer hands-on projects and more one on one attention with the instructor. The class will focus on measuring, materials, and the basic use of hand and power tools. Activities will be individually designed to fit the needs and abilities of the students. Teacher recommendation is required.

**EXPO63225- Introduction to Theatre Arts**

Introduction to Theatre Arts introduces students to the essentials of acting through acting activities, exercises, and creative play. They will develop their acting skills through team building, improvisation, scene work, and script work. The semester concludes with character development and analysis, enabling students to perform in a theatre showcase (dance, improvisation, and readers' theater). Students will be required to attend a live theatre performance as part of the course (at no additional cost to students).

**OTH070225- Dance Performance and Production 1**

This course introduces students to basic dance techniques, anatomical awareness, and the artistic processes of dance. Students will develop their technical, creative, and analytical skills through dance exercises, movement exploration, and observations. They will experience multiple styles of dance and dances from global cultural traditions. Through this course, students will explore movement and dance concepts, allowing them to compose a creative piece of their own.

**OTH080225- Dance Performance and Production 2**

In this course, students continue to develop dance techniques, anatomical awareness, and the artistic processes of dance. Students will apply their technical, creative, and analytical skills to dance exercises, movement exploration, choreography, and observations. They will experience multiple styles of dance and dances from global cultural traditions. Through this course, students will further explore movement and dance concepts, allowing them to compose complex creative choreography of their own.

**OTH070125- Theatre Performance and Production 1**

This course offers students the opportunity to learn how the acting and technical sides of a theatrical piece combine to create a complete production. Students continue to develop their acting skills through acting exercises, scene study, directing, music, and choreography. Additionally, they will be introduced to the technical aspects of theatre, including sets, lighting, makeup, costumes, and sound. Students will begin to develop the ability to analyze a script and understand the choices made in all aspects of production of a piece. Students will attend a live theatre performance (at no additional cost to students).

**OTH080125- Theatre Performance and Production 2**

In this course, students will continue learning how the acting and technical sides of a theatrical piece combine to create a complete production. They will continue developing their acting skills combined with technical aspects of a performance. Students will use their ability to independently analyze a script to make acting and technical choices made in the production of a piece. Students will attend a live theatre performance (at no additional cost to students).

*Note* - Please see page 1 for information about high school credit for courses taken in middle school.

**Note:** As part of the IB Middle Years Programme at Franklin Middle School, students learn about the countries, culture and language of Spanish- or French-speaking people. Students deepen their understanding, appreciation and connectedness to the global society. Courses meet every day for the entire school year.

**FOR060025*- Introduction to French and Culture**

Introduction to French and Culture begins with the basic skills of listening, speaking, reading, and writing as a basis for further study of the language. The curriculum includes introductory vocabulary, pronunciation, common daily expressions, questioning techniques, greetings, geography, history and culture. These are presented within the context of limited grammatical structures.

*Note* - As part of the IB Middle Years Programme at Franklin Middle School, students learn about the countries, culture and language of Spanish or French speaking people. As students develop greater understanding and appreciations of our global society, they learn the basic foundations of the French language. Students are prepared for French 1, which is taken in their 7th grade year.

**FOR074025*- French 1A**

0.5 High School Credits

**FOR074125*- French 1B**

0.5 High School Credits

**FOR017125- French 1**

1.0 High School Credits

Prerequisite – French 1A

Imagine speaking a language which is not only understood by people on five continents, but has also been a rich part of Wisconsin’s cultural heritage. From the fast-paced action of Canadian hockey rinks to the exotic shores of Tahiti, students explore the different cultural and linguistic aspects of the French-speaking world. Joining over 200 million French speakers from around the world, students prepare themselves for many different careers such as business, architecture, government, medicine, aeronautics and the arts, to name a few. Because between 40% - 60% of English vocabulary is derived from French, students reinforce English skills and improve test scores. Using a variety of media, students will study vocabulary and grammar structures in the context of the basic skills of listening, speaking, reading, and writing in French.

**FOR017225- French 2**

1.0 High School Credits

Prerequisite – French 1

From the rhythmic beat of the Senegalese drums to the jazz-infused mystique of the Louisiana Cajun country, this course continues the dynamic study of French! Spicy as gumbo and intense as the Tour de France, French language study will fire your desire to learn how to express your own joie de vivre as you continue your journey through the Francophone world. Join the French Club to immerse yourself in French culture though additional activities such as travel, food, and fun. Using a variety of media, students will study vocabulary and grammar structures in the context of the basic skills of listening, speaking, reading, and writing in French.

FOR074425* - Spanish 1A
0.5 High School Credits
FOR074525* - Spanish 1B
0.5 High School Credits  Prerequisite – Spanish 1A
FOR019125 - Spanish 1
1.0 High School Credits
¿Quieres hablar español? Let's become bilingual! Begin your Spanish language journey here by joining the more than 500 million people worldwide who speak Spanish. No matter what career you want to pursue, knowing Spanish will put you a step ahead. In Spanish 1, you will begin to communicate with others by speaking, listening, reading, and writing. You'll also learn about the traditions and cultures of fellow Spanish speakers around the world. ¡Vámonos!

FOR019225 - Spanish 2
1.0 High School Credits  Prerequisite – Spanish 1
¡Bienvenidos de nuevo! Let's continue the journey! Become a more effective communicator in Spanish. In Spanish 2, you will further develop your ability to interact with people all around the world through speaking, listening, reading, and writing. You'll also learn more about the Spanish-speaking world by exploring celebrations, traditions, and sports. ¡Olé!

FOR019325 - Spanish 3
1.0 High School Credits  Prerequisite – Spanish 2
¿Sabías que… your continued study of Spanish can lead to a future in more than 50 career paths and more than 12 college majors, from anthropology to zoology and everything in between? In Spanish 3, you'll learn how to have more in depth, real-life interactions through speaking, listening, reading, and writing. You'll also explore Spanish-speaking culture through music, dance, and more. ¡Ándale!

FOR074825** - Heritage Spanish 1A
0.5 High School Credits  Prerequisite: Fluent Spanish speaker and basic ability to read and write in Spanish
FOR074925** - Heritage Spanish 1B
0.5 High School Credits  Prerequisite: Heritage Spanish 1A*
Heritage Spanish 1 is designed for students who demonstrate a high level of oral proficiency in Spanish, a basic ability to read and write in Spanish (or English reading proficiency), and would like to improve their skills in the Spanish language. Heritage Spanish 1 is based on world language standards and benchmarks while focusing on improving reading and writing in Spanish language. Students will learn context vocabulary, standardized syntax, and a better understanding of grammatical structures. Spanish culture and history is used as a contextual platform for students' language development.
“We educate all students to be college, career and community ready, inspired to succeed in our diverse world.”

- Green Bay Area Public School District Mission Statement
