On February 16th and 17th all students (K-6) at Woodlands Elementary School participated in Basic First Aid training presented by the American Red Cross.

Students learned what services the Red Cross offers, the difference between natural disasters and emergencies, the importance of calling 911 and what information they need, how to recognize and help someone who is choking, how to bandage a wound and how to tie a sling. At the end of the presentation all students received a first aid kit to take home.

This information was well presented and the students listened seriously in an effort to be prepared in case of an emergency situation.
