

## WESTERN VIRGINIA CRAFT TRAINING CONSORTIUM

### OPERATIONAL AGREEMENT

We the undersigned representatives of distinct Schools, School Districts, Institutions, and Related Industry do affirm our intent to realize the Mission and Vision of the Consortium. We will provide an environment that promotes shared resources within our jurisdiction and among the participating members

**Mission Statement:** *The consortium exists to identify workforce training needs; to evaluate and manage existing resources; to renovate or provide planning for new facilities and resources; to seek initial and operational funding; to maintain and regularly assess a plan for a clear path forward; to provide leadership in resolving barriers to progress; and to engender collaborative involvement of public and private groups affected by related workforce availability issues.*

**Vision Statement:** *Our vision is: To establish industry certified construction and manufacturing craft training in areas currently unserved or underserved; To deliver exemplary facilities and learning environments with current resources; To build programs around indicators of need in workforce for skilled craft workers; To provide returning adults with industry certified training for employment; And to direct all toward good paying career opportunities with potential for growth within the field.*

Given the current limitation of available funding, we will assist in identifying sources and provide support in acquiring funds and training equipment. Including letters of support, identification and location of potential donated resources, sharing promising grant opportunities information, and contributing to development of documentation and proposals required by granting agencies.

We will attend and contribute to consortium meeting discussions, deliberations, and planning.
